

About JK Financial

JK Financial was founded in 2006 with the goal of focusing primarily on individuals and small business' life insurance and retirement needs. Since its inception, JK Financial has grown at a remarkable pace and expanded its market presence. Because of our size and the sheer amount of the volume of business we write, we now have the ability to represent about 70 Life Insurance Carriers. Because of this, JK Financial has unprecedented access to the most innovative and affordable programs available today. Coupled with our independent philosophy, that is, not affiliating ourselves to a single or a small group of carriers, we are able to represent our clients' best interests and not those of any particular insurance company.

We have the ability to provide a wide array of life insurance products from Term Insurance; Whole Life; Universal Life; Final Expense; Mortgage Protection; and more. We at JK Financial can handle any life insurance need you have. And because of our diverse portfolio of insurance providers, we can supply the coverage you need at the lowest possible premium. Even if you've had your current life insurance policy for some time, in most cases we can reduce what you are currently paying. Look, we know that life insurance is about the last thing most people would rather talk about, but if one short meeting could save you thousands of dollars over the coming years, wouldn't that be worth looking into?!

Additionally, each and every agent who works with us is required to go through a rigorous training program before being allowed to represent us. They are also required to attend ongoing educational meetings to guarantee they stay on the cutting edge of our industry. You will find our agents to be the most professional, ethical and no-pressure insurance agents you will ever work with. You will always be treated fairly...just as you should be.

Lastly, we would like to mention one more thing. Although we handle every form of life insurance, we have become an industry leader when it comes to Indexed Universal Life (IUL). Nobody knows more or is better at implementing IUL's than your Pro's at JK Financial. It's why so many life insurance agents from other agencies actually come to us when they need an IUL solution for their clients. You want to work with an expert when it comes to setting up these programs properly...that's your JK Financial agent.

Protecting Your Future...Keeping Our Promises
